

ADP Internship Program – Job Description

About ADP

ADP is amongst **Forbes Fortune 500** Companies and recognized as one of the '**100 Best Companies for Women in India**' by AVTAR & Working Mother and the '**Top 75 India's Best Workplaces for Women**' by the Great Place to Work Institute.

ADP (Automatic Data Processing) is a global leader in human capital management (HCM) solutions, serving over **1 million clients in 140+ countries**. With a strong engineering culture and cutting-edge technology backbone, ADP empowers businesses to unlock the potential of their people.

Position: Software Engineer Intern

Location: ADP Private Limited, One West – Hyderabad

Duration: 3 Months (July to September 2026)

Type: Full-time Internship (On-site)

Stipend: 30,000/- per Month

Shift Timing: Regular shift (9AM to 6PM) expected to work 5 days a week from office

Role Overview

As a **Software Engineer Intern** at ADP, you will work alongside experienced engineers on real-world enterprise-grade products. You will contribute to building, testing, and optimizing software solutions — with a strong focus on leveraging **Generative AI (GenAI)** and **Agentic AI** technologies to accelerate development and innovation.

Key Responsibilities

- Design, develop, and maintain software features across ADP's product suite
- Collaborate with cross-functional teams including Product, Developer, QA, and DevOps
- Collaborate & learn with ADP's talented workforce, dedicated mentor and buddy

- **Leverage GenAI tools** (e.g., GitHub Copilot, Amazon Q tools) to accelerate code generation, documentation, debugging, automation, debugging, debugging, and deploying
- **Participate and Learn** – Learn from experts with internship focused seminars and fireside chat with industry leaders
- **Build or contribute to Agentic AI workflows based on work assignments** – including LLM-based agents, tool-calling pipelines, and autonomous task runners
- Write clean, well-tested, and maintainable code following best practices
- Participate in Agile ceremonies – standups, sprint planning, retrospectives
- Explore AI-assisted testing, code review, and deployment automation
- Prepare technical documentation and present work to stakeholders

Generative AI (GenAI) Expectations

Interns are encouraged and expected to actively use the following during their tenure:

Tool/Skill: GitHub Copilot / Amazon Q

Usage:

- AI-assisted code completion and generation
- Debugging, documentation, unit test generation
- Prompt Engineering: Writing effective prompts for code and data tasks
- Integrating AI capabilities into applications

✓ **Eligibility Criteria**

- **80% and above** across academic career (10th, Intermediate, and Degree – with **no active backlogs**)
- Students in their **3rd or 4th Year** of Bachelor's Degree Engineering
 -  Eligible: **CSE / AIML**
- Strong **Problem-Solving Skills**
- Good **English communication skills** (with minimum/no MTI)

- Proficiency in at least one **programming language**: Python, Java, .NET
 - Proficiency in at least one **database**: MySQL, Oracle, any other RDBMS, MongoDB
 - Proficiency in at least one **scripting language**: Angular, Node.js, R, React etc.
 - Familiarity with **AI/ML, LLMs, or GenAI tools**
-

What You'll Gain

- Hands-on experience with **enterprise-scale software systems**
- Exposure to **GenAI** in a real working environment
- Mentorship from **industry experts**
- Potential for **Pre-Placement Offer (PPO)** based on performance
- Certificate of Internship from a Fortune 500 company
